## **Education & Digital Literacy**

Promote "Privacy Checkup" Wizards: Simple, guided tours within apps to adjust settings.

Kai Schaumburg

Advocate for Data Export Tools: Allow users to easily download and see all data the platform holds on them.

Kai Schaumburg

Use Ad Blocker & Tracker Blockers: Browser extensions that prevent tracking across sites via social media widgets.

Kai Schaumburg

## Online Shopping & E-Commerce

Encourage Use of Virtual Credit Cards: Services that generate single-use card numbers for online transactions.

Kai Schaumburg

Promote Privacy-Focused Search Engines: Use alternatives like DuckDuckGo that don't track search history for profiling.

Kai Schaumburg

Clear Browser Cookies Regularly: Or use browsers that automatically block third-party cookies.

Kai Schaumburg

## **Mobile Applications**

Audit App Permissions: Routinely check and revoke unnecessary app permissions (e.g., location, contacts).

Kai Schaumburg

Favor Paid/Donation-Based Apps: Choose apps with a direct business model over "free" apps that rely on data harvesting

Kai Schaumburg

Use the "Sign in with Apple" Option: Where available, as it offers a privacy-protecting "Hide My Email" feature.

Kai Schaumburg

## Complexity and Opaqueness

Support Standardized "Privacy Labels": Like nutrition facts, mandating a simple, front-page summary of data practices.

Kai Schaumburg

Develop "Terms of Service; Didn't Read" (TOSDR) Tools: Browser extensions that grade and summarize website terms.

Kai Schaumburg

Launch Public Service Campaigns: Government/NGO-led campaigns explaining data rights in plain language.
